

RUFFWEAR®

PAW MEASUREMENT CHART FOR RUFFWEAR DOG BOOTS

1. Place dog's paw on the Measurement Chart.
2. Lift opposite leg so that weight is placed firmly onto the paw being measured.
3. Mark on the chart where the widest part of the paw is.
4. Take note of which size grid your mark is. This is the correct size for your boot. If the mark is in between sizes, choose the smaller size.

ALTERNATE METHOD

1. If your dog's paw is difficult to align to the edge of this chart, simply use a separate sheet of paper as a replacement and follow Steps 1-3 above.
2. Measure the distance between the two marks. This indicates the correct boot size. If the measurement is between sizes, choose the smaller size.
